CRIME SCENE INVESTIGATION

INCIDENT RECONSTRUCTION

DJI ENTERPRISE VALUE

Surveillance and Reconnaissance

Law enforcement agencies often need to monitor large areas for criminal activity and gather evidence.

DJI Enterprise drones equipped with high-resolution cameras and thermal imaging technology can provide real-time surveillance, enabling law enforcement to conduct aerial reconnaissance efficiently.

Search and Rescue Operations

Locating missing persons or suspects in challenging terrains or large areas can be time-consuming.

DJI drones with thermal imaging capabilities can aid search and rescue teams in locating individuals quickly, even in low-light or remote areas

Evidence Collection

Gathering and documenting evidence at crime scenes can be time-consuming and require specialized skills.

DJI drones can capture high-resolution images and videos of crime scenes, making evidence collection more efficient and providing a detailed overview for investigations.

Rapid Deployment

Slow response times brought by traffic and congestion as well as lack of manpower availability.

DJI Enterprise drones are designed for quick and hassle-free deployment. Law enforcement officers can have a drone in the air in a minute. This rapid response capability is crucial in situations where time is of the essence at the same time the impressive 8 kilometer flight range significantly extends the reach of the law enforcers

DRONE RECOMMENDATION:

- DJI MAVIC 3 THERMAL**
- DJI MATRICE 30 THERMAL + LP12**
- DJI MATRICE 350 RTK + H20 Series**
